

GlobalSign SSL Certificates

GlobalSign offers a simplified range of SSL Certificates – fitting neatly into the three newly defined SSL classes of Domain Validation (DomainSSL) issued in 5 minutes or less, Organization Validation (OrganizationSSL) and Extended Validation (EV SSL - ExtendedSSL) activating the green address bars in next generation browsers.

All GlobalSign SSL Certificates include premium features such as strong security at no additional cost – a feature other high value SSL Providers charge at additional rates. Further key features, such as 3 Server Licenses for the price of 1 and lifetime replacement policy, ensure that GlobalSign SSL customers receive the best value, most feature packed SSL available today.

About GlobalSign

Established in 1996 and a WebTrust accredited public certificate authority, GlobalSign offers publicly trusted SSL, including EV SSL Certificates, S/MIME and Code Signing Certificates for use on all platforms including mobile devices. Its Trusted Root solution uses the widely distributed GlobalSign Root CA certificates to provide immediate PKI trust for Microsoft CA and enterprise CAs, eliminating the costs associated with using untrusted Root Certificates. Its partnership with Adobe to provide Certified Document Services (CDS) enables secure digitally signed PDF e-documents. These core Digital Certificate solutions allow its thousands of customers to conduct secure online transactions and data transfer, distribute tamper-proof code, and bind identities to client certificates for email security and remote two factor authentication. The company has a history of innovation within the online security market and has offices in the US, UK, Belgium, Japan, and China.
